Subject: Re: Question re: labs used for Dimock Testing

The answer is yes, since Microbac recently bought the assets of Northeastern Environmental Laboratories on 5/17. Our START contractor had already sub-contracted with Northeastern Environmental for this sampling event. They are doing our bacteria samples analysis.

Subject: Question re: labs used for Dimock Testing

Dennis, Rich, --- Can either of you find out whether we used a lab by the name of Microbac for any of the analysis done on Dimock well samples? I need to know ASAP.

And Debbie, did we use that lab to do the analysis on the sample you took near the Yeager impoundment? What lab did we use to conduct analysis of the EPA sample? Thanks! -- Terri
